

These Phenomena are Precursors to a Sediment Disaster

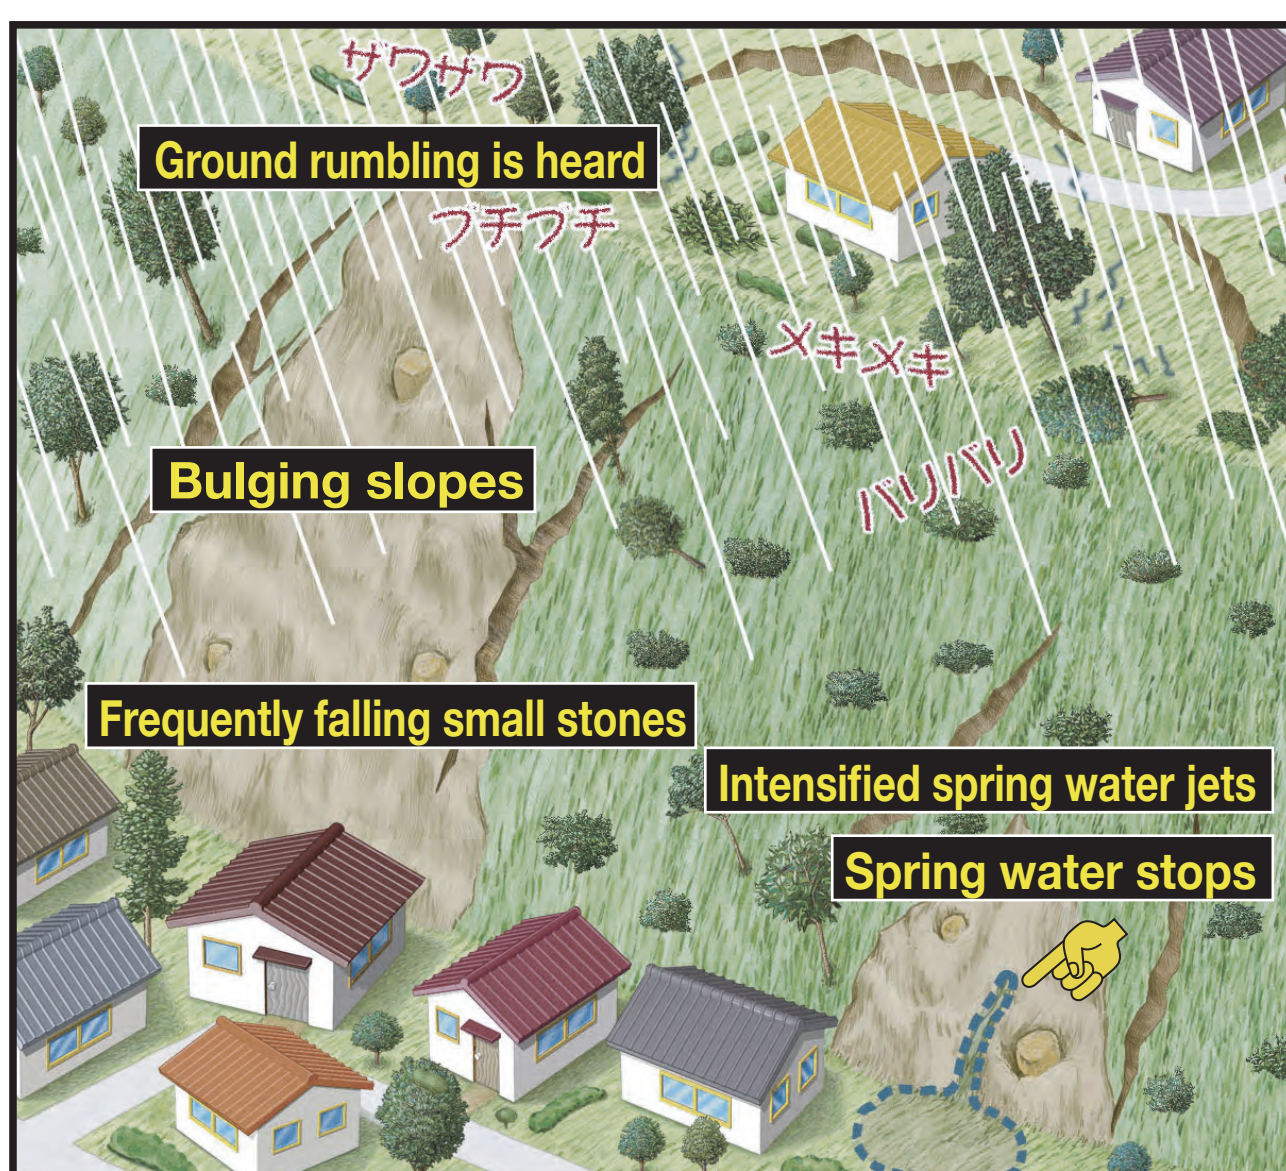

If you see this phenomenon, evacuate as soon as possible!!

Omens(Presage) of Slope Failures

Intense rain, cracks in cliffs, shaking trees and increased spring water

Increased cracks and top heavy or fallen trees

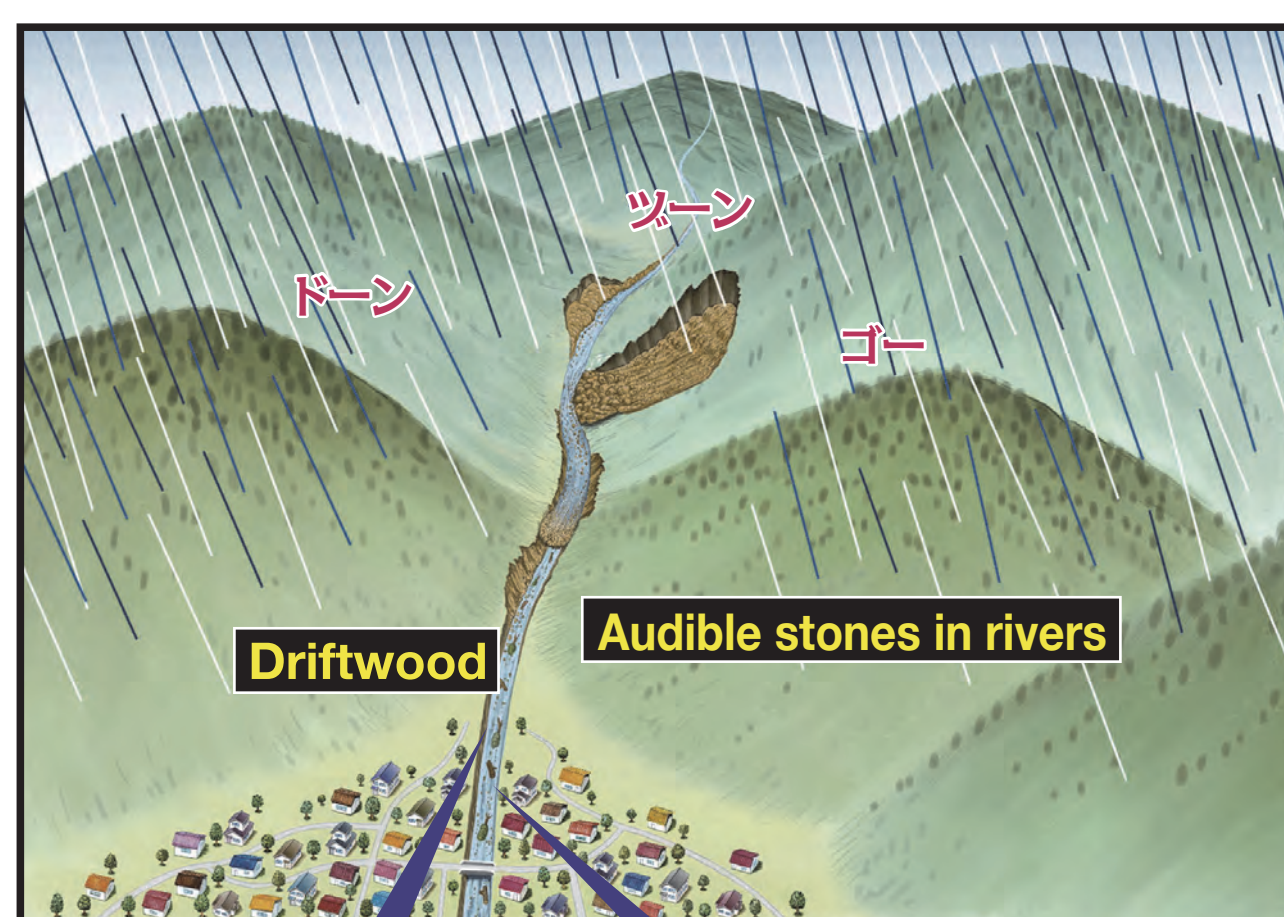

Omens (Presage) of Debris Flow

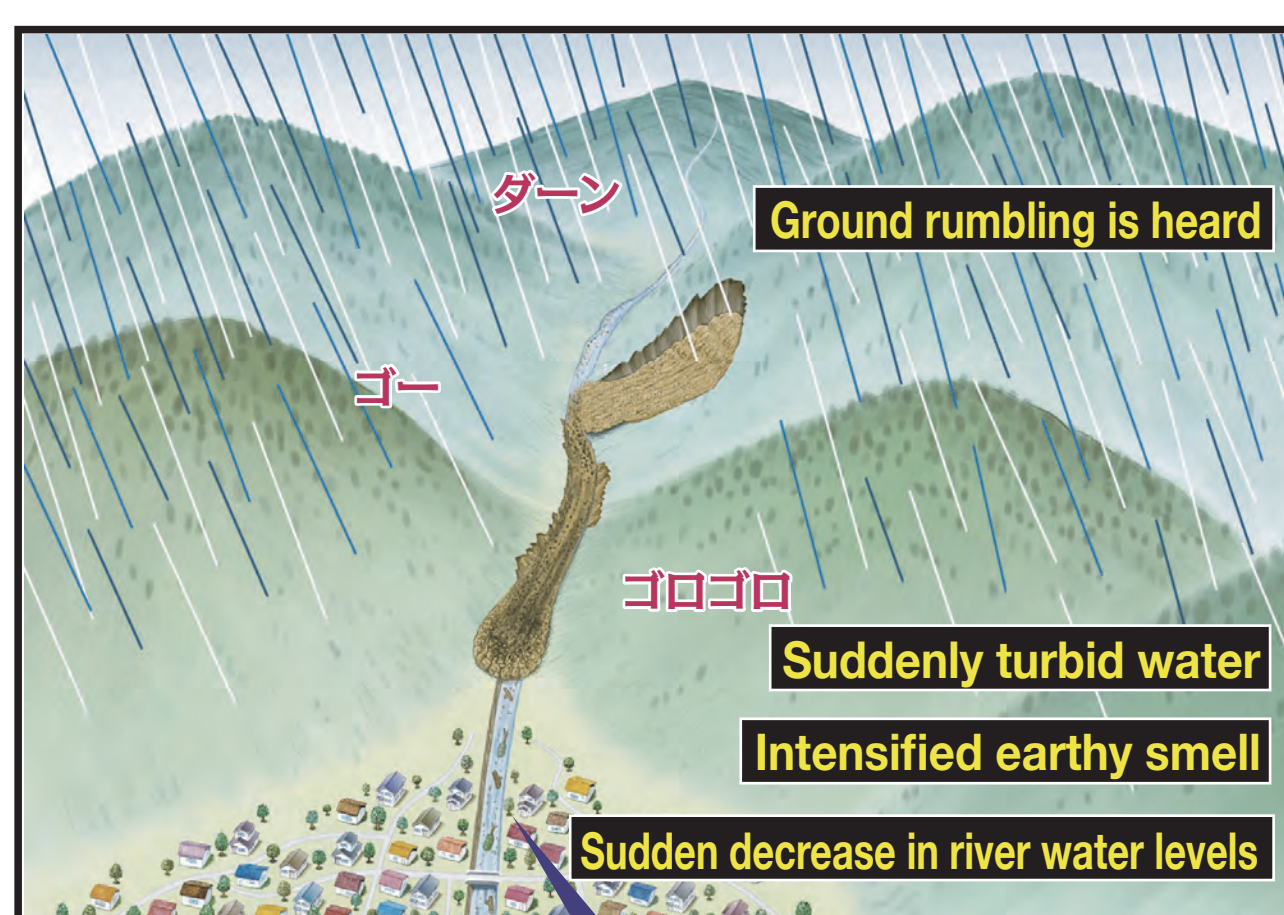

Cracked slopes caused by rain

Collapse

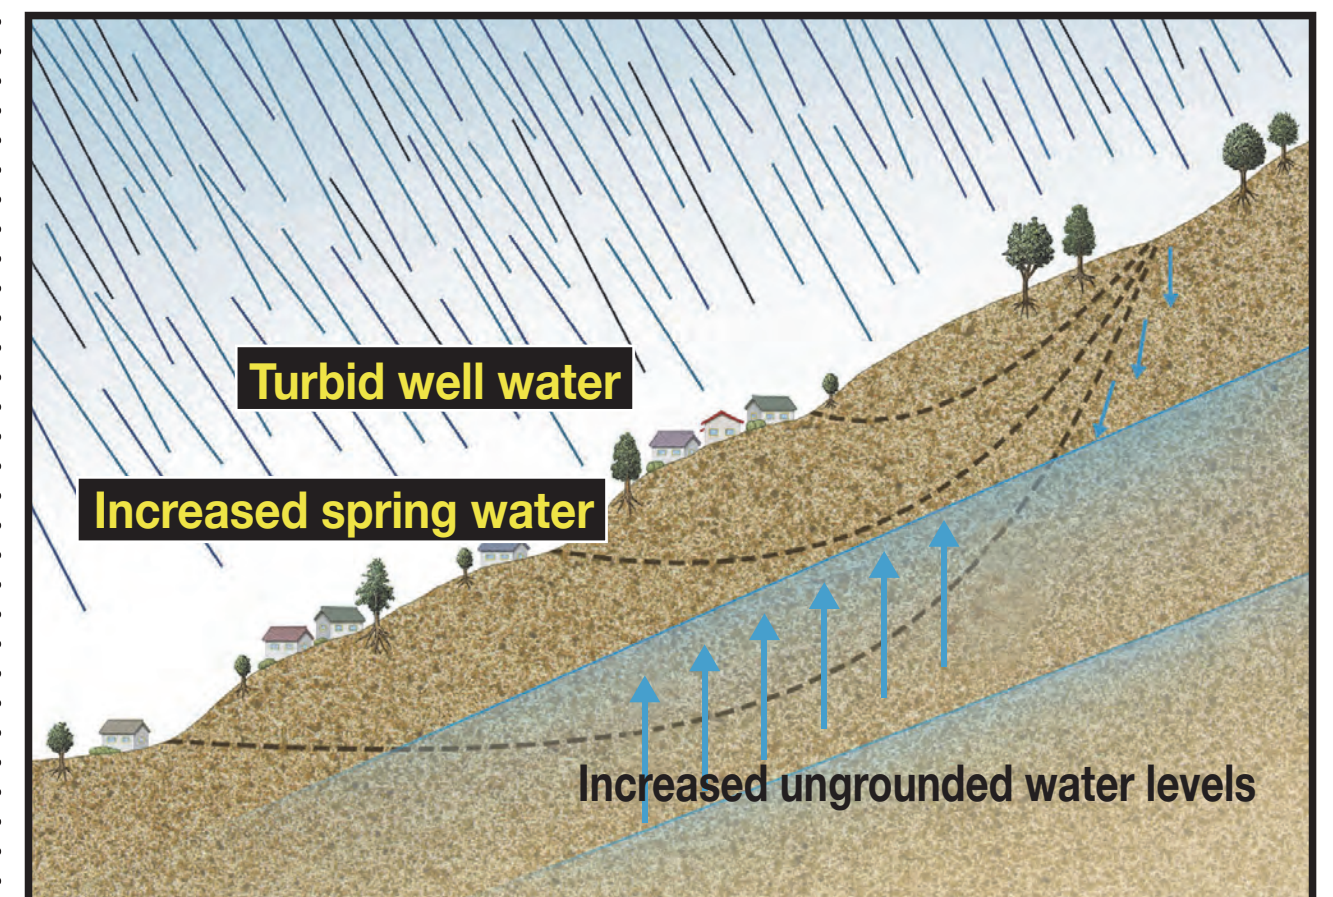

Falling debris

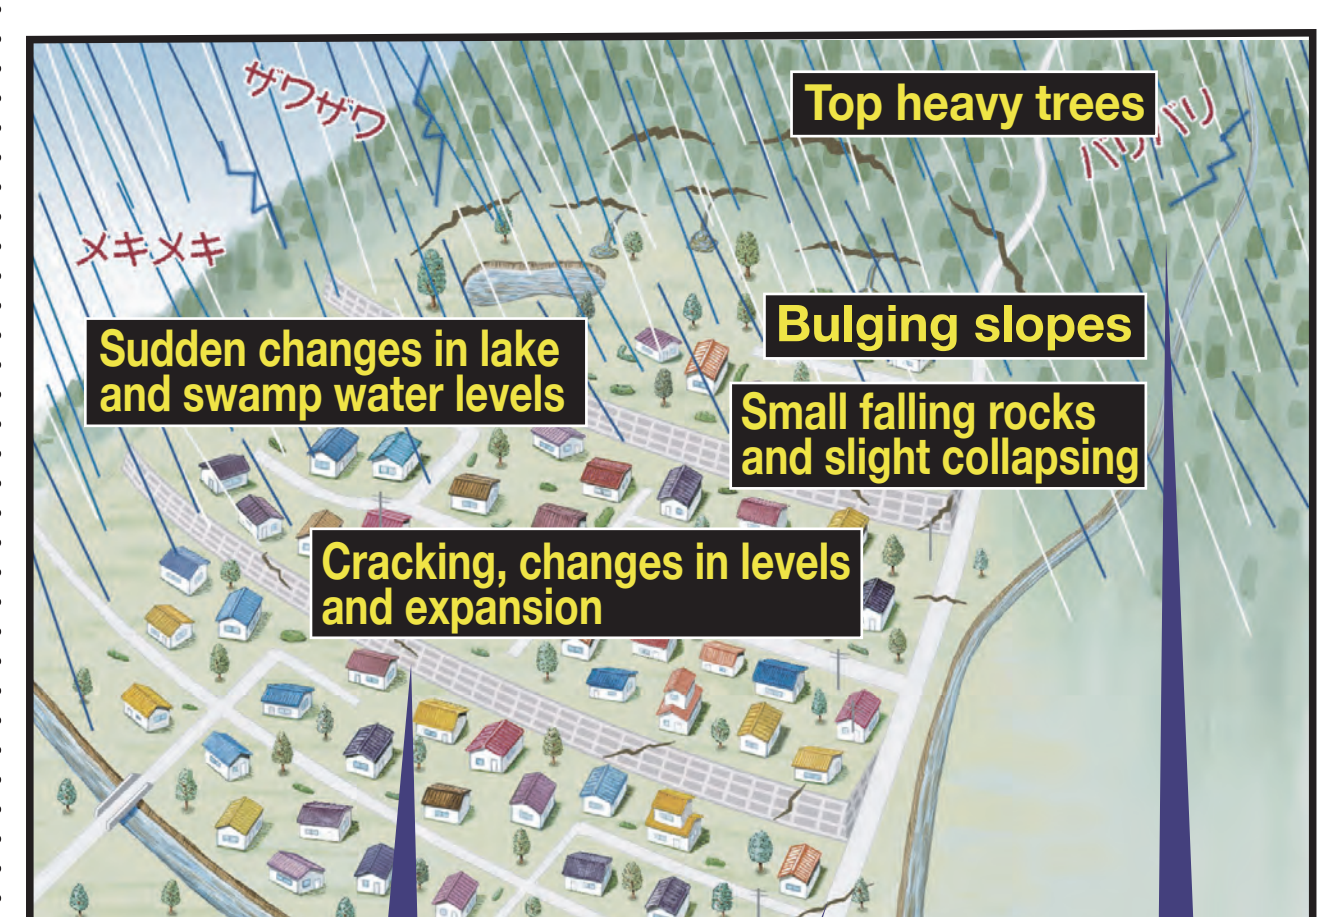

Omens (presage) of Landslides

Continued rain and increased underground water levels

Slow-moving landslide masses

Sudden landslide mass movement

*This is not an exhaustive list of all possible warning signs of sediment disasters. A sediment disaster may still occur if these warning signs are not present. Pay attention to these signs and evacuate promptly.
